

Dimmer for electronic transformers

VM131

Trailing-Edge Dimmer

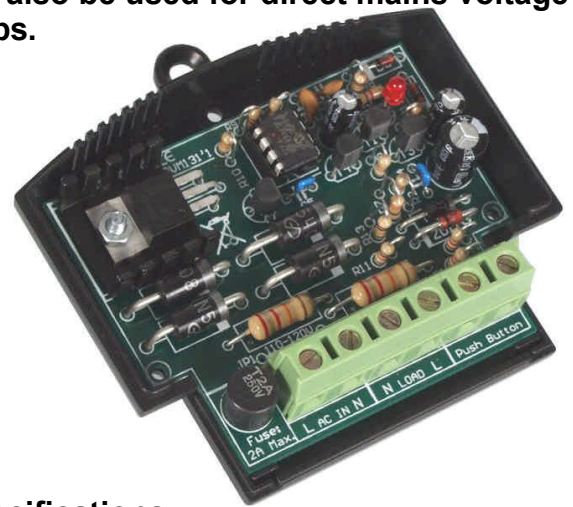

Dimming electronic transformers impossible?

Not if you have this unit !

A processor controlled circuit outputs a wave form that is suited for most dimmable electronic transformers.

Can also be used for direct mains voltage lamps.

Specifications:

- Operating voltage: 230Vac
- Push button operation: dimming and on/off
- Maximum load: 300W
- LED status indication
- Dimming cycle speed: +/- 5 sec.
- Last dim setting memory
- Soft start for increased lamp life
- Noise suppressed
- Dimensions: 80x70x25mm
